Frequently Asked Questions (FAQs)

Q1: What is the difference between an MSDS and an SDS?

A1: The terms MSDS (Material Safety Data Sheet) and SDS (Safety Data Sheet) are often used interchangeably. However, the term "MSDS" is outdated. Globally, the SDS format, standardized by the Globally Harmonized System of Classification and Labelling of Chemicals (GHS), has replaced the MSDS. The SDS provides more consistent and comprehensive information about chemical hazards.

Q2: Where can I find the Assured Hand Sanitizer MSDS?

A2: The MSDS for a specific brand of assured hand sanitizer should be available from the manufacturer's website. You might also find it on the product packaging or by contacting the manufacturer directly.

Q3: What should I do if I accidentally ingest hand sanitizer?

A3: Immediately contact a poison control center or medical professional. Do not induce vomiting unless instructed by a medical professional. The MSDS will provide specific first-aid instructions for ingestion.

Q4: Is hand sanitizer flammable?

A4: Yes, many hand sanitizers are flammable due to their alcohol content. Keep them away from open flames and ignition sources. The MSDS will specify the flammability characteristics.

Q5: How should I dispose of used hand sanitizer?

A5: Dispose of hand sanitizer according to local regulations. This may involve discarding small amounts in the trash or following specific guidelines for larger quantities. The MSDS will provide disposal instructions.

Q6: What personal protective equipment (PPE) should I use when handling large

quantities of hand sanitizer?

A6: The MSDS will specify the necessary PPE, which might include gloves, eye protection, and possibly a respirator depending on the concentration and handling procedures.

Q7: What are the potential long-term health effects of hand sanitizer exposure?

A7: Repeated or prolonged exposure to certain hand sanitizer ingredients may cause skin irritation, dryness, or other health problems. The MSDS provides detailed toxicological information about potential long-term health effects. Always consult a healthcare professional if you have concerns about long-term effects.

Q8: Are all hand sanitizers created equal in terms of safety?

A8: No, the composition and hence the safety profile of hand sanitizers vary significantly depending on the manufacturer and specific formulation. Always refer to the individual product's MSDS for detailed safety information.
